SUMMARY

Experienced in Software **Front-end** and **Back-end** development with 2+ years of experience. I believe, I am a good learner and describe myself as a lifelong learner and implementer. I prefer smart work but always ready for hard work if required.

WORK EXPERIENCE

Software Engineer

DataGrokr Analytics Pvt. Ltd.

Janurary 2022 – Present

Bengaluru, Karnataka, India

- Led the successful migration of a **monolithic** architecture to a **micro-services** based architecture, significantly improving scalability, flexibility, and performance.
- As a **full-stack developer**, I worked on multiple projects. Responsibilities include designing, developing and optimizing features, troubleshooting production issues, and handle releases.

Software Engineer Intern

Datagrokr Analytics Pvt. Ltd.

July 2021 – December 2021

Bengaluru, Karnataka, India

- Implemented responsive design principles to ensure seamless user experiences across devices and platforms.
- Worked with a team to implement RESTful APIs in Express.js, enabling analytics teams to increase reporting speed.

SKILLS

Languages : Python, JavaScript, TypeScript, SQL

Technologies and Tools : ReactJS, NodeJS, Redux, Angular, Amazon Web Services (AWS), Flask, Chalice, Docker, CI/CD, Okta, Splunk, Swagger, REST API, TDD, Jira, Git , MySQL, HTML, CSS, JSON, Shell Scripting

EDUCATION

Lovely Professional University

Bachelor of Technology in Computer Science And Engineering

Phagwara, Punjab, India

July 2017 – June 2021

PROJECTS

Real-Time Collaborative Text Editor

React, Sanic (Python framework) , WebSocket, Git etc

- Developed a real-time text editor using React for the front end and Sanic, a Python framework, for the backend. This project enables multiple users to collaborate on the same document.

Resource Management Portal

React, Lambda, Apigateway, DynamoDB, Echarts, S3, Okta, CloudFront, Git etc.

- The Resource Management Portal aims to provide a comprehensive platform for managing and tracking resources within an organization
